

SOUND PROJECTS

BY MASTER BLASTER

Child

Spring 2001 the Sound Projects Child was born...

An active floor standing reference monitor, as much pleasing for the ears as for the eyes. The 2 $\frac{1}{2}$ -way aluminium sound reinforcement enclosure is constructed as a sphere-like shape which features approach the characteristics of the perfect loudspeaker cabinet. This, combined with Sound Projects well known amplifier technology featuring in many theatres, clubs and studios worldwide, can provide you with superior sound quality in your own environment. An environment that will always merge with Child's tender design.

SUPERIOR SOUNDREINFORCEMENT
