## SP15

The sound reinforcement system shall hold one low-weight neodymium 15-inch driver, powered by a 1000W amplifier. The maximum peak output of the total system shall be 130dB at 1m. The system shall reproduce the 30-60Hz frequency range. The systems coverage angle shall be omnidirectional.

The cabinet shall be constructed of cross grain laminated multiplex, covered by a protective 2 component polyurethane coating. The total system weight including amplifiers and audio control shall be 38 kg only. It shall have an IEC XLR-3 audio in and output connector and a powercon in and thru mains connector.

The system shall be a self-powered design holding its own protective audio logic control electronics and amplifiers within the cabinet.
